12-GAUGE DRAG STABILIZED ROUND WITH GREEN MARKING POWDER

PRODUCT SPECIFICATIONS	
Diameter	12-Gauge
Length	2.50 in / 6.3 cm
Projectile Count	1
Velocity	270 fps / 82 mps
Minimum Safe Range	20 ft / 6.1 m
Maximum Effective Range	75 ft / 22.9 m
PROJECTILE SPECIFICATIONS	
Material	Tear-shaped bag with tails covered in fluorescent green marking powder and filled with #9 shot
Length	5.00 in / 12.7 cm
Weight	1.43 oz / 40 g
Part No.	3028
Warranty	5 years from date of manufacture

ALL SPECIFICATIONS ARE AVERAGES AND SUBJECT TO CHANGE

The Drag Stabilized™ 12-Gauge Marking Round can be deployed in crowd control situations to protect the riot line, cover or enhance chemical munitions, or target and mark specific agitators and organizers of the crowd. When used in this fashion, it is both a psychological deterrent and physiological distraction for pain compliance, crowd dispersal or area denial.

The Drag Stabilized™ 12-Gauge Marking Round incorporates a 12-gauge shell loaded with a 40-gram, tear shaped projectile constructed of cotton and ballistic material blend covered in fluorescent green marking powder and filled with shot. This design utilizes stabilizing tails for improved accuracy and sustained energy over a longer range. The design and construction reduces the likelihood of the fabric rupturing or causing abrasion and lacerations. The Drag Stabilized™ 12-Gauge Marking Round utilizes smokeless powder as the propellant.

The Drag Stabilized™ 12-Gauge Rounds are the Law Enforcement Communities' number one choice for Less Lethal Impact Munitions. The "point-of-aim, point-of-impact" capabilities provide the ability to acquire a single target for incapacitation, distraction or to gain compliance. It is recommended that these rounds should only be used in an eighteen inch (18") cylinder bore shotgun with no choke. Use of semi-automatic weapons or different barrel lengths may affect velocity. The marking powder used in the 3028 is abrasive in nature and can foul the barrel; more frequent cleaning intervals should be used to prevent the projectile from becoming lodged in the barrel.

The operator should be adequately trained in the use of Less Lethal Impact Munitions and have a thorough understanding of the round and considerations for selecting shot placement such as level of threat, target distance, size and clothing. The Drag Stabilized™ 12-Gauge Marking Round proves most successful in incapacitation when used within its effective range of approximately 20 to 50 feet. These ranges offer the necessary energy and accuracy to target the large muscle groups of the subject, and to adequately mark the target. These areas provide sufficient pain and affect one's mobility while significantly minimizing serious or life-threatening injuries. Multiple shots may be required to achieve results.

WARNING

This product can expose you to chemicals including Lead Salts and Hexavalent Chromium, which are known to the State of California to cause cancer, and Lead Salts, which are known to the State of California to cause birth defects or other reproductive harm.
