

# 37MM RUBBER BATON BLACK POWDER ROUND

**DEFENSE  
TECHNOLOGY®**

PRODUCT SPECIFICATIONS	
Diameter	1.50 in / 37 mm
Length	8.00 in / 20.3 cm
Projectile Count	5
Velocity	250 fps / 76 mps
Minimum Safe Range	40 ft / 12.2 m skip fired
Maximum Effective Range	75 ft / 22.9 m skip fired
PROJECTILE SPECIFICATIONS	
Material	Rubber
Height	1.25 in / 3.2 cm
Diameter	1.35 in / 3.4 cm
Weight	1.30 oz / 36.4 g
Part No.	1177
Warranty	5 years from date of manufacture
<b>ALL SPECIFICATIONS ARE AVERAGES AND SUBJECT TO CHANGE</b>	
<p>The 37mm Rubber Baton incorporates an 8.0-inch casing that contains five (5) rubber projectiles, which utilizes black powder as the propellant.</p> <p>The 37mm Rubber Baton Round is most widely used as a crowd management tool by Law Enforcement and Corrections. The 37mm Rubber Baton Round is generally deployed in low trajectories or skip fired in the general direction (<b>non-target specific</b>) of the intended targets, administering a means of pain compliance over greater distances than most of its counterparts.</p> <p>The 37mm Rubber Baton Round is intended to be skip fired, but may be direct fired at the discretion of the operator. When used in either manner, the operator should be adequately trained in the use of Less Lethal Impact Munitions and have a thorough understanding of the round and considerations of selecting shot placement such as level of threat, target distance, size, and clothing.</p> <p>As a pain compliance round for crowd control, it is most suitable at medium to extended ranges of fire, approximately 40 to 75 feet. Inside of 40 feet, this round may result in minor injuries. It is ideal for correctional facilities where multiple impacts from greater stand-off distances may be desired for countering yard disturbances.</p> <p>The 37mm Rubber Baton Round is not recommended to be used as dynamic direct fire, single subject, high energy round due to the density, weight, and velocity of the projectiles. The close deployment ranges usually necessary for the appropriate transfer of energy in single subject acquisition would likely result in serious injury or death.</p> <p>It differs from its smokeless powder counterpart 40mm Rubber Baton, in that it may be acquired in an 8.0-inch casing that provides the greatest quantity of rubber projectiles and that it utilizes black powder as the propellant. Black powder will usually disperse the wood projectiles in wider patterns.</p>	
 	

**⚠ WARNING**

This product can expose you to chemicals including Lead Salts and Hexavalent Chromium, which are known to the State of California to cause cancer, and Lead Salts, which are known to the State of California to cause birth defects or other reproductive harm.
