Part No.	1600
Warranty	5 years from date of manufacture

ALL SPECIFICATIONS ARE AVERAGES AND SUBJECT TO CHANGE

The 1600 Command Initiated Adapter replaces the standard M201A1 Type Fuze in the Spede-Heat™, Riot Control, Maximum HC Smoke, Saf-Smoke™, Triple-Chaser®, Han-Ball™, Pocket Tactical, Colored Smoke and Flameless Tri-Chamber grenades. It is most commonly used in tactical situations by Law Enforcement and Corrections and was designed for instantaneous and remote initiation.

The Command Initiated Adapter should only be deployed in areas that have been visually observed to be clear of potential hazards and is only to be used when properly inserted and tightened into one of the above noted grenades. Once properly inserted into the grenade and connected to additional Thermo Tube, it can be remotely deployed using a staging spike, robotic delivery system or using the WallBanger™ System Bang Pole. Please refer to the product specification sheet of the grenade being used for specifics on product application and performance.

Please read instructions included with the Command Initiated Adapters before using.

CAUTION: DO NOT cut the Thermo Tube lead prior to splicing additional lengths of Thermo Tube. The Thermo Tube lead has been protected from moisture with a plastic nipple that is to be removed at the time of splicing.
