LOW ROLL™ DISTRACTION DEVICE® BODY

PRODUCT SPECIFICATIONS	
Canister	Hex Design, Steel / Reusable 25x
Diameter	1.75 in / 4.45 cm
Diameter Point-to-Point	2.00 in / 5.00 cm
Length	4.63 in / 11.75 cm
Part No.	8933
Warranty	5 years from date of manufacture

ALL SPECIFICATIONS ARE AVERAGES AND SUBJECT TO CHANGE

The Low Roll™ reloadable steel body is the newest version of the original Multi-Port Plus™, reusable, non-bursting canister body. The top and bottom ports are designed to ensure equalization of blast pressure to minimize or eliminate movement. The body is designed to reduce rolling when deployed and will accept the 15-Gram, 12-Gram and 4-Gram reloads with an M201A1 type fuze, or the Command Initiated reload. It is recommended that the immediate area for deployment be visually affirmed to be clear of personnel and that the device is delivered so that the ports are free from obstruction. If the bottom port is obstructed by an object or wall, the Distraction Device® body may move. The cleared area for deployment should be 5 - 6 feet around which the device is expected to come to rest. The reloads should only be discharged when they are fully inserted and tightened into the Distraction Device® body.

WARNING: TO BE USED BY TRAINED LAW ENFORCEMENT, CORRECTIONAL OR MILITARY PERSONNEL WHO HAVE SUCCESSFULLY COMPLETED A TRAINING PROGRAM FOR THE DEPLOYMENT OF DISTRACTION DEVICE® UNITS. **IMPROPER USE OF THE DISTRACTION DEVICE® UNIT CAN RESULT IN DEATH OR SERIOUS BODILY INJURY.**
