

MK-9S OC VAPOR

SHOWN WITH WAND ADAPTER WHICH AIDS IN TARGETED APPLICATION (SOLD SEPARATELY)

IDEAL FOR CONFINED SPACE EXTRACTION

MK-9S OC VAPOR

The Defense Technology® MK-9S OC Vapor delivers an intense concentration of major capsaicinoids. It is a non-flammable, EDW-safe formula that produces a high volume mist, exceeding CRT and DOT flammability protocols. This Defense Technology OC Vapor inflames the mucous membranes and upper respiratory tract, resulting in an intense burning sensation and a dramatic cough reaction. Unlike stream delivery products, OC Vapor affects the respiratory tract and any exposed skin, diminishing a person's ability to continue violent actions. Onset is immediate and extreme. Regardless of whether exposure is in an open area or in a confined space, the targets immediately focus on their own discomfort.

Once the subject is removed from the contaminated area to fresh air, the respiratory effects are resolved within minutes. This formulation evaporates in a very short distance, eliminating the need for extensive area clean up or personal decontamination procedures.

Environmental decontamination is minimal as the product dissipates a short distance from the container.

FEATURES

- High volume dispersal of intense .7% major capsaicinoids
- Delivers 8–10 short bursts
- Formulation requires transportation within a steel canister
- Total weight of 12.7 ounces
- Effective range of over 15 feet
- Available wand adapter (sold separately) aids in targeted application or penetrating under doors, food ports and window gaskets
