Sound Level	120 dB at 5' (1.5m)
Part No.	1697TSC
Warranty	5 years from date of manufacture

ALL SPECIFICATIONS ARE AVERAGES AND SUBJECT TO CHANGE

The Defense Technology® Low Roll™ Distraction Device® Training Fuze with Safety Clip offers a reliable and safe way to introduce students to the proper deployment protocols used by your department. The safety clip is designed to keep the pull-pin against the device body to prevent the pin from protruding and possibly snagging on other objects. The Low Roll™ Distraction Device® Training Fuze (1697TSC) will deliver 120 dB of sound and a slight flash. Used in conjunction with the 8933T Low Roll™ Distraction Device® Training Body or the 8922T Low Roll II™ Distraction Device® Training Body, the fuze and body assemblies allow students to understand the safe applications of the Defense Technology® reloadable Distraction Device® models.

In keeping with developing safe habits, Defense Technology® recommends students to wear all appropriate safety equipment when deploying these devices. Both the standard and safety clip variations of this training fuze are not regulated by the ATF.
